MILO

Business Executive Summary v4.0

AI-Powered Wellness Spending Intelligence Platform

Company:	DeepmAInd B.V.
Stage:	MVP Complete, Pre-Launch
Funding Sought:	$400K - $600K Seed
Target Launch:	Q2 2026

Investment Highlights

• **Category Creator**	**First wellness-aware spending analytics**
• **$2.4M Revenue**	**Year 3 projected (conservative)**
• **58% Margins**	**Operating margins at scale**
• **Production Ready**	**iOS app + FastAPI backend complete**
• **AI-Native**	**Gemini 2.0 Flash + Veryfi OCR**
• **6-10x Return**	**Conservative Year 3 exit**

1 Executive Overview

1.1 Company Snapshot

Attribute	Details
Company	DeepmAInd B.V.
Product	MILO - AI-Powered Personal Finance App
Category	Wellness-Aware Spending Analytics
Stage	MVP Complete, Pre-Launch
Headquarters	Netherlands (EU)
Funding Sought	$400K - $600K Seed
Target Launch	Q2 2026
Projection Model	Conservative

1.2 Mission Statement

*"Empower health-conscious consumers to understand not just **how much** they spend, but **whether they're spending on healthy choices** — while building an ethically-sourced, privacy-compliant consumer data platform."*

1.3 Three-Sentence Summary

MILO is a production-ready iOS application powered by a FastAPI backend that combines AI-driven receipt scanning (Veryfi OCR), proprietary health scoring (0-5 scale), and an intelligent chat assistant ("Milo" — powered by Gemini 2.0 Flash) into a unified wellness-aware spending platform.

The technical stack is complete: native SwiftUI frontend with Firebase authentication, actor-based service architecture, SSE streaming chat, and a modular Python backend with 17-category classification and PostgreSQL persistence.

With $400K-$600K in seed funding, MILO targets 25,000 monthly active users by Year 3 and a minimum $15M valuation at exit.

2 The Opportunity

2.1 Market Convergence

MILO sits at the intersection of three rapidly growing markets:

Market Segment	2025 Size	2030 Projection	CAGR
Receipt Scanner Apps	$2.5B	$5.1B	11.1%
Personal Finance Apps	$7.2B	$14.4B	12.3%
Consumer Data Analytics	$12.0B	$26.5B	22.0%
Combined TAM	**$21.7B**	**$46.0B**	**16.2%**

Table 1: Total Addressable Market

2.2 Why Now?

Favorable Conditions

- Health-conscious spending is mainstream (not niche)
- AI capabilities enable 95%+ categorization accuracy at low cost
- Privacy regulations create premium for compliant data providers
- Legacy competitors (Fetch, Ibotta) haven't innovated in years
- B2B demand for consented consumer data at all-time high
- Gemini 2.0 Flash enables real-time AI chat at affordable rates

Headwinds to Consider

- Subscription fatigue (41% of consumers affected)
- Economic uncertainty affecting discretionary spending
- App Store saturation increasing CAC
- Privacy regulations increasing compliance costs

3 Product & Technology

3.1 Core Product Features

Receipt Scan	Health Scores	AI Intelligence
Veryfi OCR API v8	0-5 proprietary scale	Gemini 2.0 Flash
99%+ accuracy	17 spending categories	95%+ categorization
PDF + JPEG + PNG	Nutrition-based scoring	"Milo" chat assistant
Duplicate detection	Per-item granularity	SSE streaming
15 receipts/month	Visual health display	100 msgs/month

Table 2: MILO Platform Features

3.2 Unique Value Proposition

User Need	Current Solutions	MILO Advantage
Track spending	Bank apps show merchants only	**Item-level granularity (17 categories)**
Healthy choices	Separate nutrition apps	**Health scores 0-5 on every receipt**
AI insights	Generic chatbots	**Personalized spending coach**
Data privacy	Sold without consent	**Tiered consent model, GDPR-ready**
Modern UX	Legacy interfaces	**Native SwiftUI dark-mode**

Table 3: Competitive Value Proposition

3.3 Health Scoring System (Proprietary IP)

Score	Rating	Color	Examples
5	Excellent	Green	Fresh vegetables, fruits, water
4	Good	Light Green	Lean proteins, eggs, plain dairy
3	Moderate	Yellow	Bread, pasta, cheese
2	Fair	Orange	Processed meats, some snacks
1	Poor	Red	Chips, candy, cookies, sodas
0	Avoid	Dark Red	Alcohol, energy drinks
null	Non-Food	Gray	Household, personal care

Table 4: Health Scoring Scale

3.4 Subscription Tiers

Tier	Price	Receipts	Chat	Target
Free Trial	$0 (14 days)	10 total	20 total	New users
Gold	$5.99/mo	25/month	100/month	Regular shoppers
Platinum	$12.99/mo	50/month	200/month	Power users

Table 5: Subscription Pricing

4 Technical Architecture

4.1 System Architecture Overview

MILO Technical Stack v4.0

iOS Frontend: SwiftUI (iOS 17+), Firebase Auth, StoreKit 2, Actor-based Services
Backend API: FastAPI 0.109.0 (Python 3.11), PostgreSQL + SQLAlchemy 2.0, Async/Await
AI/ML Services: Veryfi OCR v8, Gemini 2.0 Flash, 17-Category Classification
Infrastructure: Railway Hosting, Firebase Storage, End-to-End Encryption

4.2 Backend Architecture (FastAPI)

The backend follows a clean layered architecture:

- **API Layer** (`app/api/v2/`): Route handlers, request validation
- **Service Layer** (`app/services/`): Business logic, external API integration
- **Repository Layer** (`app/db/repositories/`): Data access, SQL queries
- **Model Layer** (`app/models/`): SQLAlchemy ORM definitions

Key services:

- `receipt_processor_v2.py` — OCR → Categorize → Save pipeline
- `veryfi_service.py` — Veryfi OCR integration
- `categorization_service_gemini.py` — AI categorization & health scores
- `dobby_chat_service_gemini.py` — Streaming chat assistant
- `rate_limit_service.py` — Usage tracking (15 receipts, 100 messages/mo)

4.3 iOS Frontend Architecture (SwiftUI)

The iOS app uses a modern MVVM architecture:

- **Views** (`Views/`): SwiftUI views with dark-mode design
- **ViewModels** (`ViewModels/`): ObservableObject state management
- **Services** (`Services/`): Actor-based API clients
- **Models** (`Models/`): Codable data structures

Key components:

- `AuthenticationManager` — Firebase Auth, token sharing via Keychain
- `AnalyticsAPIService` — Actor-based async/await API client
- `MiloAIChatService` — SSE streaming via AsyncThrowingStream
- `ReceiptUploadService` — Multipart form data upload

4.4 Database Schema

Table	Primary Key	Key Fields
`users`	UUID	firebase_uid (unique), email, display_name
`receipts`	UUID	user_id (FK), store_name, total_amount, status
`transactions`	UUID	user_id, receipt_id, category (enum), health_score
`user_profiles`	firebase_uid	first_name, last_name, gender
`user_rate_limits`	auto	messages_used, receipts_used, period dates

Table 6: PostgreSQL Schema Overview

Composite indices for performance:

- `ix_transactions_user_date` (user_id, date)
- `ix_transactions_user_store` (user_id, store_name)
- `ix_transactions_user_category` (user_id, category)

4.5 17 Spending Categories

4.6 API Endpoints (v2)

5 Business Model

5.1 Three-Pillar Revenue Architecture

Year 3 Revenue Mix (Conservative): $2.4M ARR

Revenue Stream	Amount	Share
B2B Data Monetization	$1,250K	52%
B2C Subscriptions	$834K	35%
Analytics Reports	$315K	13%

#	Category	Health	Examples
1	Meat & Fish	3-4	Chicken, salmon, beef
2	Alcohol	0	Beer, wine, spirits
3	Drinks (Soft/Soda)	0-1	Cola, energy drinks
4	Drinks (Water)	5	Water, sparkling
5	Household	null	Cleaning products
6	Snacks & Sweets	1-2	Chips, candy
7	Fresh Produce	5	Fruits, vegetables
8	Dairy & Eggs	3-4	Milk, cheese, yogurt
9	Ready Meals	2-3	Prepared foods
10	Bakery	2-3	Bread, pastries
11	Pantry	3	Pasta, rice, canned
12	Personal Care	null	Shampoo, dental
13	Frozen	2-3	Frozen foods
14	Baby & Kids	null	Diapers, baby food
15	Pet Supplies	null	Pet food
16	Tobacco	0	Cigarettes, vapes
17	Other	varies	Uncategorized

Table 7: Spending Categories with Health Scores

Method	Endpoint	Description	Limit
POST	/receipts/upload	Upload receipt image	15/mo
GET	/receipts	List grouped receipts	–
DELETE	/receipts/{id}	Delete receipt + transactions	–
GET	/transactions	List with filters	–
PUT	/transactions/{id}	Update transaction	–
POST	/chat/	Send message to Milo	100/mo
POST	/chat/stream	Streaming chat (SSE)	100/mo
GET	/analytics/summary	Period spending summary	–
GET	/analytics/categories	Category breakdown	–
GET	/analytics/trends	Spending trends	–

Table 8: API v2 Endpoints

5.2 Pillar 1: B2C Subscriptions (35%)

5.3 Pillar 2: B2B Data Monetization (52%)

5.4 Cost Structure (Per-User)

6 Financial Projections

6.1 3-Year Revenue Forecast (Conservative)

6.2 Unit Economics (Conservative)

6.3 Profitability Milestones

7 Go-to-Market Strategy

7.1 Launch Timeline

7.2 Marketing Budget (Year 1: $75K)

Tier	Monthly	Annual	Receipts	Chat
Trial	FREE	–	10 total	20 total
Gold	$5.99	$59.99	25/mo	100/mo
Platinum	$12.99	$129.99	50/mo	200/mo

Table 9: Subscription Tiers

Product	Description	Pricing	Margin
DaaS	Per-panelist data feeds	$25-50/user/yr	70-80%
Syndicated Reports	Quarterly trend reports	$2K-25K each	85-90%
Custom Research	Bespoke analysis	$5K-50K	60-70%

Table 10: B2B Data Products

8 Competitive Positioning

8.1 Competitive Landscape

8.2 SWOT Analysis

9 Risk Assessment

9.1 Risk Summary

9.2 Critical Risks

Risk 1: GDPR Non-Compliance at Launch

Impact: CRITICAL (Cannot launch in EU, 52% of revenue blocked)
Probability: MEDIUM (If timeline slips)
Mitigation: Dedicated budget, 12-week remediation plan
Residual Risk: LOW after mitigation

Risk 2: Insufficient Seed Funding

Impact: CRITICAL (Operations cease)
Probability: MEDIUM
Mitigation: Conservative projections, multiple investor outreach
Residual Risk: MEDIUM

9.3 Technical Risk Mitigations

10 Compliance & Legal

Component	Per Receipt	Per Chat	Technology
Veryfi OCR	$0.08	–	API v8
Gemini 2.0 Flash	$0.001	$0.002	Categorization + Chat
Firebase	–	–	$8K/year fixed
Railway	–	–	$20K/year fixed
Total Variable	$0.081	$0.002	–

Table 11: Per-Transaction Cost Structure

Metric	Year 1	Year 2	Year 3
Trial Signups	12,500	35,000	60,000
Conversion Rate	15%	17%	18%
Ending Paid Users	1,688	5,355	9,720
B2C Revenue	$128K	$460K	$835K
B2B Revenue	$80K	$500K	$1,250K
Analytics Revenue	$20K	$140K	$315K
Total Revenue	**$228K**	**$1.1M**	**$2.4M**
Operating Profit	($72K)	$418K	$1.39M
Operating Margin	-31.6%	38.0%	**58.0%**

Table 12: 3-Year Financial Projections

10.1 GDPR Compliance Status

GDPR Readiness Assessment

Current Status: NON-COMPLIANT (pre-launch expected)
Readiness Score: 25/100
Required Investment: 75K-115K EUR
Timeline: 12 weeks

CRITICAL: Cannot launch or monetize data without GDPR compliance

10.2 Compliance Priorities

11 Investment Thesis

11.1 Investment Summary

Investment Opportunity (Conservative)

Amount Sought: $400,000 - $600,000
Round: Seed
Use: Product, Compliance, Growth, Operations
Runway: 18-24 months
Target Return: 6-10x at Year 3 exit (conservative)

11.2 Use of Funds ($500K Mid-Point)

Metric	Gold	Platinum	B2B Panel
Customer LTV (Net)	$50.92	$121.48	$80.00
Customer CAC	$17.00	$17.00	$30.00
LTV:CAC Ratio	3.0:1	7.1:1	2.7:1
Payback Period	4.5 mo	2.6 mo	6-8 mo

Table 13: Unit Economics by Segment

Milestone	Timeline	Revenue Run-Rate
Break-Even (Monthly)	Month 10	$50K MRR
Cash Flow Positive	Month 14	$80K MRR
Sustained Profitability	Month 24	$150K MRR

Table 14: Profitability Timeline

11.3 Investment Highlights

- **Category Creation:** First wellness-aware spending analytics platform
- **Production Ready:** Complete iOS + FastAPI stack, not just prototype
- **AI-Native:** Gemini 2.0 Flash at $0.002/interaction
- **Sustainable Economics:** 58% operating margins, 3:1+ LTV:CAC
- **Diversified Revenue:** Three pillars reduce concentration risk
- **Capital Efficiency:** Profitable by Month 14, 18-24mo runway

11.4 Exit Valuation (Year 3)

11.5 Potential Acquirers

12 Strategic Roadmap

12.1 Milestone Timeline

12.2 Critical Success Factors

1. **GDPR Compliance** (Non-Negotiable) — Must achieve before launch; blocks 52% of revenue otherwise
2. **Trial Conversion** — Achieving 15%+ trial-to-paid drives all B2C revenue
3. **Data Consent** — Achieving 40%+ opt-in enables B2B revenue stream
4. **Unit Economics** — Maintaining CAC $<$ $20 and LTV:CAC $>$ 3:1 validates scalability
5. **B2B Capability** — Building sales function; 52% of revenue depends on this

Pre-Launch (M-3 to M0)	**Launch (M1-M6)**	**Scale (M7-M18)**	**Expand (M19-36)**
ASO Setup	Soft Launch	CAC < $20	Android
Beta Program	PR Push	2 B2B Pilots	UK Market
Waitlist (500)	Paid Ads	25% Organic	Enterprise
Content	Influencers	5K MAU	15K MAU
300 Beta	*1.5K MAU*	*7K MAU*	*25K MAU*

Table 15: Go-to-Market Phases

Channel	**%**	**Budget**	**Focus**
Paid Acquisition	35%	$26,250	App installs, retargeting
Influencer Marketing	20%	$15,000	Micro partnerships
Content & SEO	20%	$15,000	Organic growth engine
B2B Marketing	15%	$11,250	ABM, thought leadership
Brand & Creative	10%	$7,500	Assets, video

Table 16: Marketing Budget Allocation

13 Conclusion

Investment Recommendation: CAUTIOUS BUY

MILO represents a category-creating opportunity with meaningful upside potential, tempered by execution risks that warrant conservative expectations.

Strengths:

- Unique value proposition in growing markets
- Production-ready iOS + FastAPI technology stack
- Viable unit economics (3:1+ LTV:CAC)
- Diversified revenue reduces single-point-of-failure risk
- AI-native architecture with Gemini 2.0 at low cost

Risks:

- GDPR compliance required before launch (12-week delay possible)
- B2B revenue (52%) depends on data consent rates
- No existing user base requires acquisition spending
- Subscription fatigue trend may impact conversion

The $400K-$600K seed investment offers 6-10x return potential under conservative assumptions, with meaningful downside protection through early profitability focus and diversified revenue streams.

Recommendation: Invest with clear milestones and capital tranches
